

Assignment-14.1

Name: Sushma Purella

H. No:2303A52188

Batch:44

Task1: Portfolio Website Design

Prompt:

Create a personal portfolio website with three main sections: About Me, Projects, and Contact. Suggest a suitable modern color palette and typography for a professional and visually appealing design. Develop the layout using CSS Flexbox and Grid to ensure responsiveness across different screen sizes. Implement smooth scrolling navigation for better user experience. The design should be clean, interactive, and user-friendly.

Code:

```
0  sushma141task1.html > @html > @head > @style > % body
1  <!--
2  You are building a personal portfolio website to showcase your
3  work.
4  Requirements:
5  * Create sections for About Me, Projects, and Contact.
6  * Use AI to:
7  o Suggest color palettes and typography.
8  o Create a responsive layout with Grid/Flexbox.
9  o Add smooth scrolling navigation.

        </div>

        <div class="project-card">
          <h3>Password Manager</h3>
          <p>Secure password storage system built using Python.</p>
        </div>

      </div>
    </section>

    <!-- Contact -->
    <section id="contact">
      <h2>Contact</h2>

```

```

186     </section>
187
188     <!-- Contact -->
189     <section id="contact">
190       <h2>Contact</h2>
191       <form>
192         <input type="text" placeholder="Your Name" required>
193         <input type="email" placeholder="Your Email" required>
194         <textarea rows="4" placeholder="Your Message"></textarea>
195         <button type="submit">Send Message</button>
196       </form>
197     </section>
198
199 </body>
200 </html>

```

Observation:

The AI-generated design provided a clean and modern portfolio layout using a professional color palette and readable fonts. The use of Flexbox and Grid helped create a responsive structure that adapts well to different screen sizes. Smooth scrolling improved user navigation, making the website more interactive and user-friendly. Overall, AI significantly reduced design effort and helped in quickly building a well-structured and visually appealing portfolio website.

Task 2 – Online Store Product Page

Prompt:

Design a responsive product display page for an online store that includes product image, title, price, and an "Add to Cart" button. Use BEM (Block Element Modifier) methodology for CSS styling. Ensure the layout is responsive using Flexbox or Grid. Add hover effects for better user interaction and implement a JavaScript alert when the "Add to Cart" button is clicked.

Code:

assgn14.1 task2.html > ...

```
1  <!-- Task 2: Online Store Product Page
2  Design a product display page for an online store.
3  Requirements:
4  • Display product image, title, price, and "Add to Cart" button.
5  • Use AI to:
6    o Style with BEM methodology.
7    o Make layout responsive.
8    o Add hover effects and "Add to Cart" alert. -->
9
10 <!DOCTYPE html>
11 <html lang="en">
12 <head>
13 <meta charset="UTF-8">
14 <meta name="viewport" content="width=device-width, initial-scale=1.0">
15 <title>Product Page</title>
16
17 <style>
18   body {
19     font-family: Arial, sans-serif;
20     background: #f5f5f5;
21     display: flex;
22     justify-content: center;
23     align-items: center;
24     height: 100vh;
25   }
26
27   /* Block */
28   .product {
29     background: white;
30     padding: 20px;
31     border-radius: 10px;
32     max-width: 300px;
33     text-align: center;
34     transition: 0.3s;
35   }
36
37   /* Hover effect */
38   .product:hover {
39     transform: scale(1.05);
40     box-shadow: 0 5px 20px rgba(0,0,0,0.2);
41   }
42
43   /* Elements */
44   .product_image {
45     width: 100%;
```

```

<? assgn14.1 task2.html > ...
11 <html lang="en">
12 <head>

44 .product__image {
47 }
48
49 .product__title {
50     font-size: 20px;
51     margin: 10px 0;
52 }
53
54 .product__price {
55     color: green;
56     font-weight: bold;
57     margin-bottom: 15px;
58 }
59
60 .product__button {
61     background: #4F46E5;
62     color: white;
63     padding: 10px;
64     border: none;
65     cursor: pointer;
66     width: 100%;
67     border-radius: 5px;
68 }
69
70 .product__button:hover {
71     background: #06B6D4;
72 }
73
74 /* Responsive */
75 @media (max-width: 600px) {
76     .product {
77         max-width: 90%;
78     }
79 }
80 </style>
81
82 </head>
83
84 <body>
85
86

```

```

33
34 <body>
35
36 <div class="product">
37   
38
39   <h2 class="product__title">Smart Watch</h2>
40
41   <p class="product__price">₹2999</p>
42
43   <button class="product__button" onclick="addToCart()">
44     Add to Cart
45   </button>
46 </div>
47
48 <script>
49 function addToCart() {
50   alert("Product added to cart!");
51 }
52 </script>
53
54 </body>
55 </html>

```

Observation:

The product page was successfully designed using BEM methodology, which helped maintain clean and structured CSS. The responsive layout ensured proper display across different screen sizes.

Hover effects improved user interaction, making the design more engaging. The "Add to Cart" button functionality using JavaScript alert demonstrated basic interactivity. Overall, AI helped in quickly generating a professional and functional product page design.

Task 3 – Event Registration Form

Prompt:

Design an event registration form for a conference that collects user details such as name, email, phone number, and session selection. Implement JavaScript-based form validation to ensure correct input. Ensure accessibility by using proper labels and ARIA attributes. Style the form with a clean and professional user interface, and make it responsive for different screen sizes.

Code:

```
<> assgn14.1 task3.html > ...
1  |<!-- Task 3: Event Registration Form
2  |  Build an event registration form for a conference.
3  |  Requirements:
4  |  • Collect name, email, phone number, and session selection.
5  |  • Use AI to:
6  |    o Add form validation with JavaScript.
7  |    o Make the form accessible with labels and ARIA.
8  |    o Style with a professional look.
9  |  -->

113       <option>Data Science</option>
114       <option>Cyber Security</option>
115     </select>
116     <div id="sessionError" class="error"></div>
117   </div>
118
119   <button type="submit" class="form_button">Register</button>
120
121 </form>
122
123 <script>
124 function validateForm() {
125   let valid = true;
```

```

1 <script>
2 function validateForm() {
3
4     // Clear errors
5     document.getElementById("nameError").innerText = "";
6     document.getElementById("emailError").innerText = "";
7     document.getElementById("phoneError").innerText = "";
8     document.getElementById("sessionError").innerText = "";
9
10    // Name validation
11    if (name === "") {
12        document.getElementById("nameError").innerText = "Name is required";
13        valid = false;
14    }
15
16    // Email validation
17    if (!email.includes("@")) {
18        document.getElementById("emailError").innerText = "Enter valid email";
19        valid = false;
20    }
21
22    // Phone validation
23    if (phone.length !== 10 || isNaN(phone)) {
24        document.getElementById("phoneError").innerText = "Enter valid 10-digit phone number";
25        valid = false;
26    }
27
28    // Session validation
29    if (session === "") {
30        document.getElementById("sessionError").innerText = "Please select a session";
31        valid = false;
32    }
33
34    if (valid) {
35        alert("Registration Successful!");
36    }
37
38    return valid;
39 }
40 </script>
41
42 </body>
43 </html>

```

The screenshot shows a web browser window with the address bar displaying "C:/Myfiles/Attachments/Desktop/AI-Assist/assgn14.1%20task3.html". A dark modal alert box is centered on the screen, displaying the text "This page says Registration Successful!" with an "OK" button. Below the alert, a form titled "Event Registration" is visible. The form contains the following fields:

- Full Name:** A text input field containing "Sushma Purella".
- Email:** A text input field containing "sushmapurella1330@gmail.com".
- Phone Number:** A text input field containing "8247668612".
- Select Session:** A dropdown menu with "AI & Machine Learning" selected.
- Register:** A blue button at the bottom of the form.

Observation:

The event registration form was successfully developed with proper input fields and validation using JavaScript. Accessibility features such as labels and ARIA attributes improved usability for all users.

The form was styled with a clean and professional design, ensuring a good user experience. AI helped in efficiently generating structured code with validation and responsive design.

Task 4 – Resume Website

Prompt:

Design a one-page online resume website with sections for Profile Summary, Skills, Education, and Experience. Suggest professional typography styles suitable for a resume. Use CSS Grid to align sections in a structured layout. Implement smooth scrolling navigation between sections for better user experience. Ensure the design is clean, modern, and responsive.

Code:

```
1  <!-- Task 4: Resume Website
2  Task 4 – Resume Website
3  Build a one-page online resume.
4  Requirements:
5  * Sections: Profile Summary, Skills, Education, Experience.

Observation:

The resume website was successfully designed as a one-page layout with structured sections for profile, skills, education, and experience. CSS Grid helped in organizing the content efficiently, while smooth scrolling improved navigation. The use of professional typography enhanced readability and visual appeal. AI assisted in creating a clean, modern, and responsive resume design quickly and effectively.

Task 5 – Restaurant Menu Page

Prompt:

Design a digital restaurant menu page that displays menu items including name, description, and price. Suggest a food-friendly color palette suitable for a restaurant website. Create a responsive card-based layout using CSS Grid or Flexbox. Add hover effects to enhance user interaction and make the design visually appealing and user-friendly.

Code:

```
❏ assign141 task5.html > ...
1 <!-- Task: Restaurant Menu Page
2 Design a digital menu page for a restaurant.
3 Requirements:
4 • Display menu items with name, description, and price.
5 • Use AI to:
6   o Suggest a food-friendly color palette.
7   o Design a responsive card-based layout.
8   o Add hover effects on menu items-->
